

- » Role-based Web Client
- » Multi-client capable
- » Multilingual
- » Avoid redundant data entry
- » Work in order flow – multimodal orders
- » Intelligent task management
- » Multi-routing – all departments work on the same order
- » Fully integrated financial accounting

INTERFACES

TRAXON / CHAMP (Communication)

- Fully integrated interface software
- Reliable message exchange with the highest data quality
- The connection to TRAXON runs automatically in the background
- Sending and receiving new messages without manual intervention

CASS

- CASS file import with automatic reconciliation of net rates
- Transparent variance analysis for fast claims handling

LBA

- By storing user-specific login data, a fully integrated LBA check can be performed in Xfreight
- Xfreight – Support for documentary requirements in air freight security:
 - Automated security documentation: Includes EU database queries, audit trails for forwarders, status labeling (Known/Unknown Shipper, Known Consignor), and automated creation of secured or unsecured pickup and forwarding orders
 - Complete traceability: Detailed history of all conducted checks and documented security measures

Consulting team certified according to LBA, chapter 11.2.3.9, "Aviation security certificate".

ZAPPAIR (Communication)

- Fully integrated interface software for all German airports
- Sending and receiving of new messages without manual intervention
- Reliable message exchange with highest data quality

SANCTIONS LIST SCREENING

- Intelligent screening for optimized hit lists
- Manual single check, batch check, synchronous check, DELTA check
- Archiving of result logs

FUNCTIONALITY

Master Data

- Centralized company and address management with approval workflow
- Detailed role and permission concept
- Direct revenue display & credit limit monitoring (FIBU)
- Service types & airline-specific billing
- Central maintenance of customs tariff numbers & product descriptions

Order Entry

- Direct AWB / HAWB / MAWB workflow
- ATLAS integration for AES, ZB & NCTS
- Shipment entry for pre-, main, and post-carriage
- Calculated cost & profit overview at a glance
- Custom order flows & demand-optimized input

Consolidation

- MAWB data entry & dispatch dialog
- Centralized and decentralized consolidation
- Freight cost allocation to HAWBs
- Direct profit share billing at HAWB level
- Invoicing to agents & co-loader billing

+ Billing & Invoicing

+ Print Outputs

+ Inventory Management
