FUNCTIONS

THIS
HOW

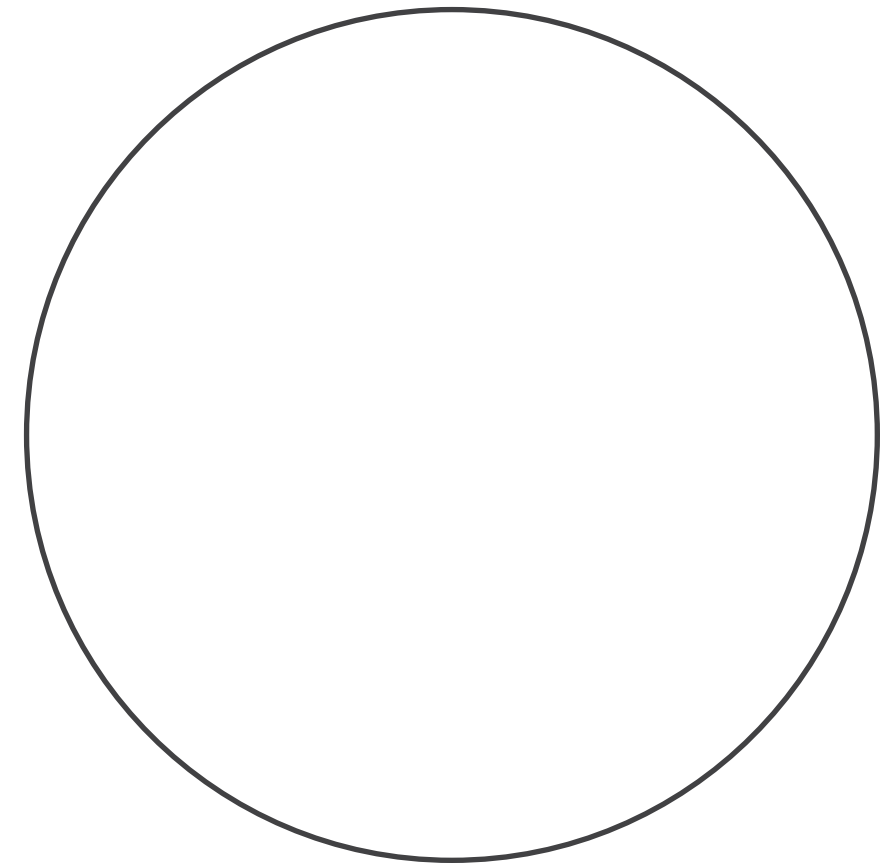

freight

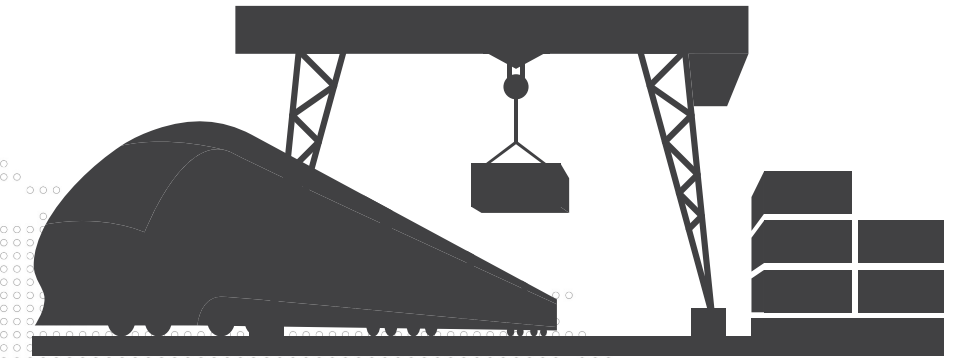

WAS
CREATED

**WHY
Xfreight ?**

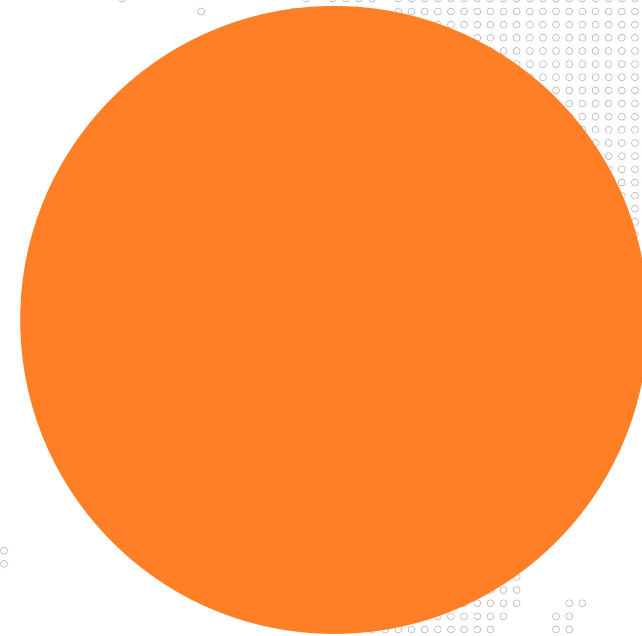

BECAUSE
it has given
the **chaos**
and complexity
an
understandable
structure

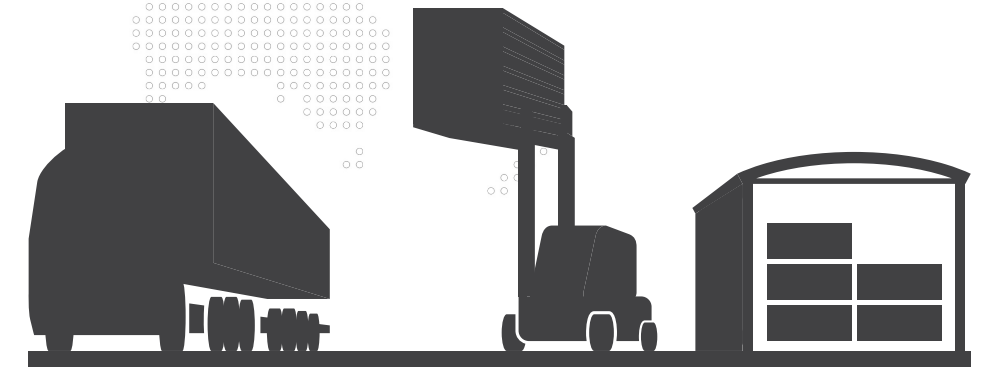

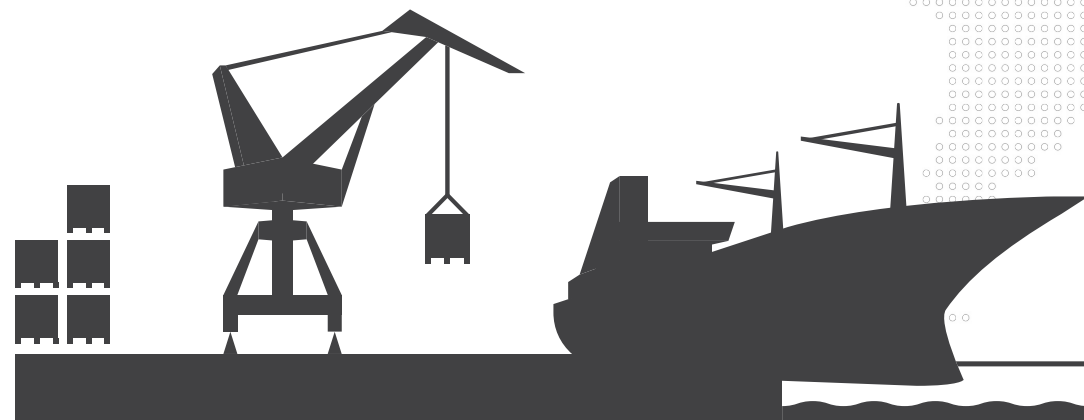

**and
because
it has redefined
the PACE and QUALITY
of work and business processes.**

MULTIMODAL

INTERNATIONAL

**All types of transport
worldwide,
perfectly combined,
in one forwarding file**

Container as FCL or consolidated container
LCL as breakbulk or bulk cargo

Groupage multimodal

Bulk / Heavy-lift cargo / RoRo

INTERFACES:

CUSTOMS – ATLAS / AES

Dakosy

DBH (BHT)

Containertracking (CARGOIMP, Portbase,
Project44)

Sanctions list check/ Compliance check

Order entry, processing and invoicing
of air freight orders

All common types of air waybills:
direct AWB, house (HAWB),
back-to-back, consolidation

AWB types can be changed during
and after entry

INTERFACES:

CUSTOMS – ATLAS / AES

ZAPP-AIR

TRAXON/ CHAMP

LBA (SECURE SUPPLY CHAIN CHECK)

CASS

IGLU

Sanctions list check/ Compliance check

General cargo, groupage and heavy lift

**Transport participant in pre-carriage /
post-carriage or independent truck order**

Dangerous goods and groupage

FEATURES:

- Simple planning and scheduling of orders for group items
- Shipment entry of main, pre- and/or post-carriage in one shipment
- Control station disposition
- Preparation of CMR and Borderos
- Centralized or decentralized capture of incoming and/or outgoing invoices
- Credit memo procedure in accounts payable and accounts receivable
- Division / Department-specific order flows
- Sanctions list check/ Compliance check

Rail loading FCL / LCL

FCL or LCL for consolidated container

INTERFACES:

- CUSTOMS– ATLAS / AES
- Sanctions list check/ Compliance check

Secure integration with Xfreight

Exchange and display of shipment and status information in real-time

Authorization system for simple and complex cooperation and communication

FEATURES:

- Shipment tracking and order documentation
- Real-time access to all data
- User specific access rights
- Advanced search and filtering of order data
- Predefined standard roles: Customer, Shipper, Consignee, Agent/ Partner
- Upload and download documents
- Automatic email notification

Special features :

FULLY INTEGRATED FINANCIAL ACCOUNTING

Less errors and low process costs through fast access and effective data management.

SECURE AND RELIABLE

- GoB-compliant and certified
- Correct preliminary sales declaration
- Compliance check
- Operating result = fiscal result
- Protocols of all essential accounting transactions

TRANSPARENCY

- Forwarding book with receipts, expenses and provisions at a glance
- Reliable real-time data analysis and statistics
- Accounts receivable and payable
Offsetting

EFFICIENT

- Automatic payment transactions (SEPA and ISO payment) and import of bank statements
- Time savings due to central use of master data
- Sales and purchase invoices in real time

DIRECT LINK TO CUSTOMS through integration of Xcust.

Certified and innovative solution for secure and immediate communication with customs authorities in Germany (ATLAS / AES) and the Netherlands (AGS).

COST- AND TIME EFFICIENCY

- No third-party providers involved and no additional transaction costs
- No additional software required: all processes in one ERP - order entry system
- Fast preparation and transmission of customs declarations

COMPATIBLE AND FLEXIBLE

- Easy integration due to modular design
- Fully compatible with most ERP based systems
- Communication via LOG-FTAM possible
- Branch concept is fully supported

DIRECT DATA EXCHANGE WITH CUSTOMS

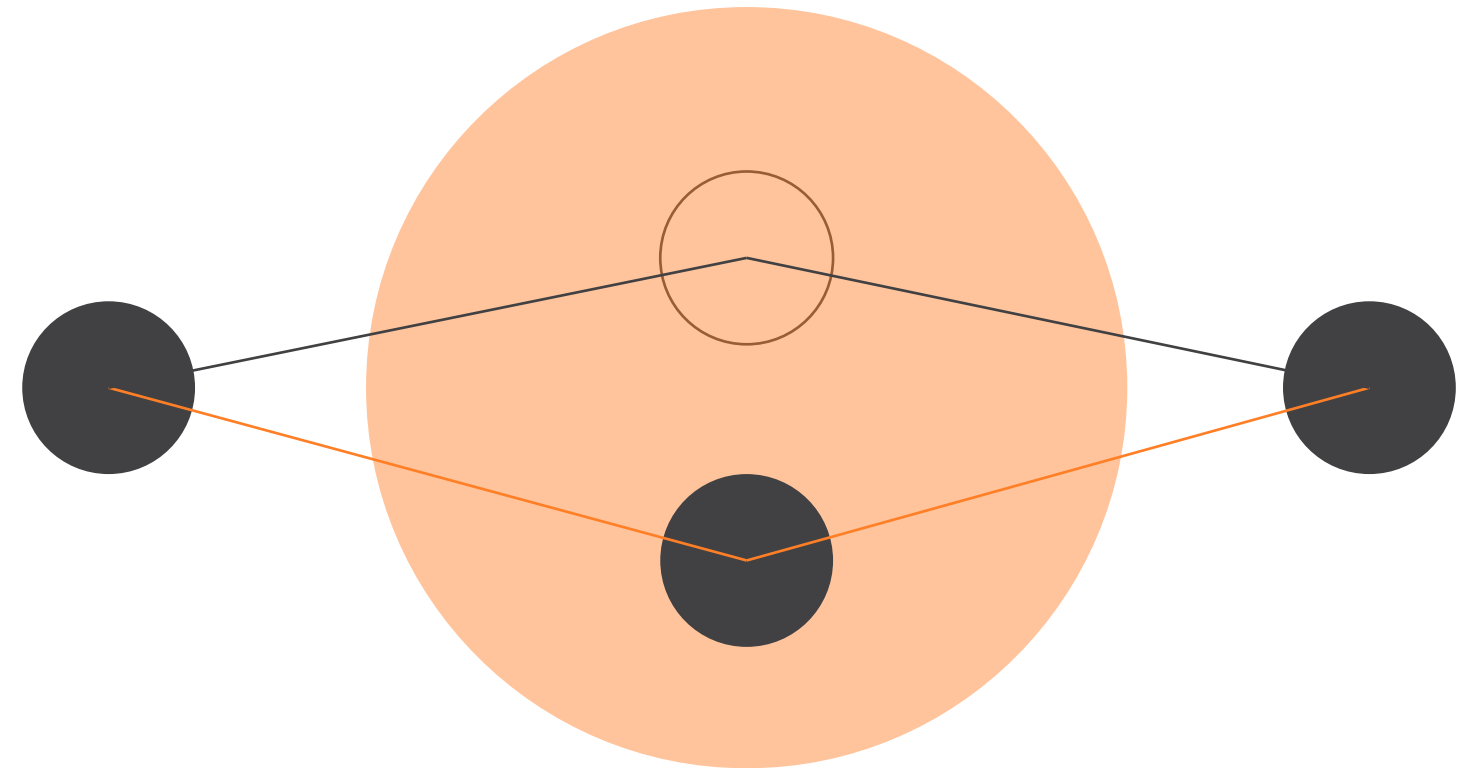

- Automatic posting of CUSTAX (tax notice)
- Status control
- Full transparency about Customs confirmations in the "Messagelog"
- Automatic error detection through integrated plausibility check

POWER BI

*A new level of business intelligence:
Effective data visualization for transparent processes and better decisions.*

INTELLIGENT AND TRANSPARENT

- Creation of comprehensive and interactive data visualizations from multiple, unconnected data sources
- Easier communication and collaboration between all participants
- Better analysis capability
- More control over project targets
- Forecasting

DOCUMENT MANAGEMENT WITH ARTIFICIAL INTELLIGENCE (AI)

Optimization of the supply chain through advanced automation.

QUICK AND SMART

- Intelligent data/text recognition from digitally transmitted documents
- Automatic e-mail confirmations/notifications
- Automatic data exchange with Xfreight
- Reduction of manual data entry effort to a minimum
- Error prevention through process digitization
- Web-based portal for business partners and customers

CO2 - EMISSION DATA CALCULATION

Sustainability reporting for transparency and climate protection.

CLARITY AND CLIMATE PROTECTION

- Cross-transport calculation of CO2 emissions
- Compliance requirements adherence
- Improvement of customer relationships
- Analysis tools for long-term sustainability strategy
- Transport and customer-specific CO2 reporting

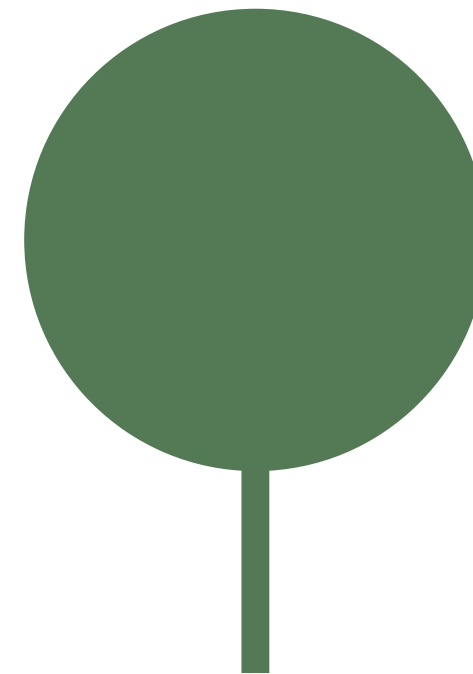

eFREIGHT & eAWB & eBL

Paperless documents for legally regulated, faster and clearer data exchange!

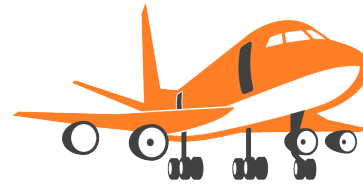

SIMPLE AND FLEXIBLE

- Accelerated communication with air and sea freight authorities through EDI-supported transmission
- Role-based document creation thanks to "task rules" according to company-specific, official and international regulations
- Digital documentation facilitates document storage and the search for documents
- Significantly (approx. 65%) lower paper consumption / Less print volume

SAVING
RESOURCES
FOR
THE
ENVIRONMENT

eFREIGHT/eAWB

TRAXON/CHAMP - Communication - Interface

Fully integrated interface software

Communication link to TRAXON runs automatically in the background

Without manual intervention messages are sent and received

Format CargoIMP Rel. 34

MESSAGE TYPES :

- | | |
|---------------------------|-----|
| - Air Waybill | FWB |
| - Consolidation (HAWB) | FHL |
| - Status request | FSR |
| - Status response | FSA |
| - Status update | FSU |
| - Confirmation of receipt | FMA |
| - Error message | FNA |

AND VERY IMPORTANT :

WE ARE CLOUDREADY !

Together with our customers, we have elevated logistics IT to a new level in recent years. With **Microsoft Dynamics 365 Business Central**, a flexible software architecture has been created, enabling the simplification and automation of many complex processes in the freight forwarding industry.

The achieved results are intended to not only satisfy us but, above all, bring benefits to our users. We are eager to see how we can further fulfill their needs and look forward to upcoming challenges.
